

Pretrained policy on the fixed midpoint sphere | raw temperature 1

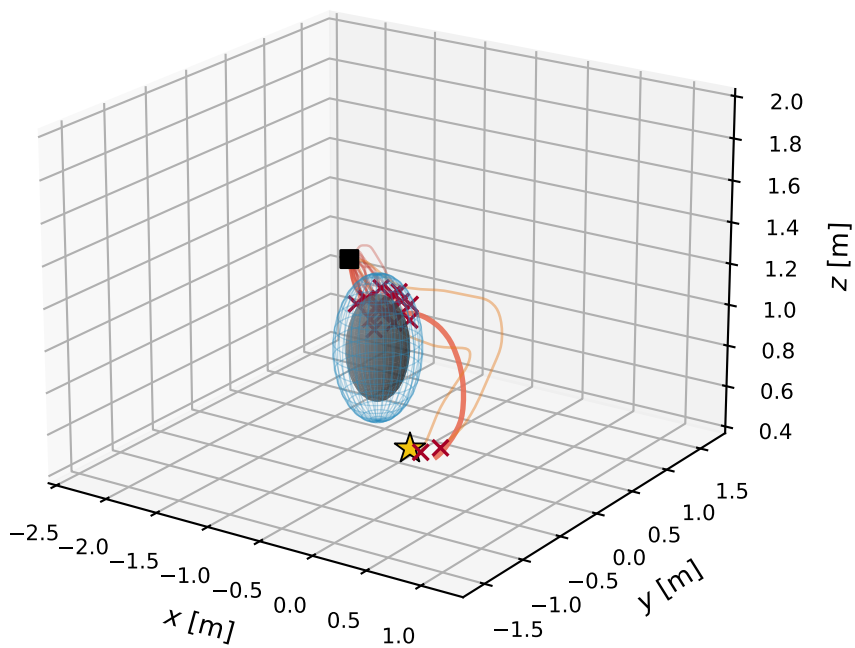

$\gamma = 0.1$ S 5 / C 14 / OOB 1

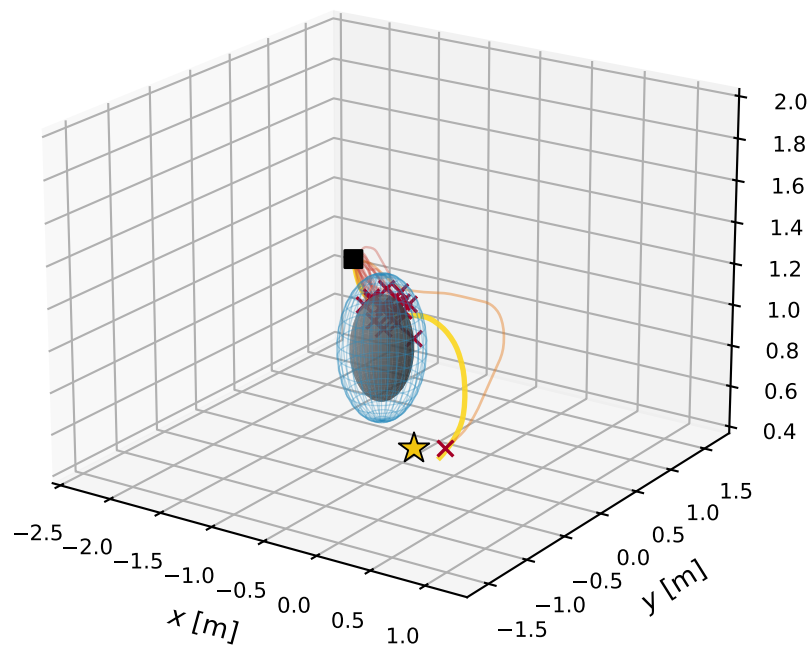

$\gamma = 0.3$ S 4 / C 15 / OOB 1

$\gamma = 0.5$ S 1 / C 17 / OOB 2

$\gamma = 1$ S 1 / C 18 / OOB 1

M=20 per gamma; colored paths succeed, muted red paths collide, red X marks first failure
